Corrects a typo in the OpenGL 2.0 specification

# OpenGL® Shading Language (GLSL) Quick Reference Guide

Describes GLSL version 1.10, as included in OpenGL v2.0, and specified by "The OpenGL® Shading Language", version 1.10.59. Section and page numbers refer to that version of the spec.

## **DATA TYPES (4.1 p16)**

```
mat2, mat3, mat4
sampler1DShadow, sampler2DShadow
                              samplerCube
                                                   sampler1D, sampler2D, sampler3D
                                                                                                                            bool, bvec2, bvec3, bvec4
                                                                                                                                                        int, ivec2, ivec3, ivec4
                                                                                                                                                                                float, vec2, vec3, vec4
```

# DATA TYPE QUALIFIERS (4.3 p22)

# global variable declarations:

const varying attribute output from Vertex shader (READ/WRITE), interpolated compile-time constant (READ-ONLY) application (READ-ONLY) input per-vertex to Vertex shader from OpenGL or input to Vertex and Fragment shader from OpenGL or then input to Fragment shader (READ-ONLY) application (READ-ONLY

### function parameters:

inout copied out on return, but not initialized constant function input value initialized on entry, and copied out on return value initialized on entry, not copied on return (default)

# VECTOR COMPONENTS (5.5 p 30)

component names may not be mixed across sets x, y, z, w

s, t, p, q r, g, b, a

PREPROCESSOR (3.3 p9)

```
#undef
#if
                                                                                                                                                                                                #endif
                                                                                                                                                                                                                                       #else
                                                                                                                                                                                                                                                              #ifndef
                                                                                                                                                                                                                                                                                 #ifdef
